

Advancement of Treatments FOR RARE DISEASES

Shaping the Future of Rare Disease Treatments in Europe

Rare Diseases affect over 30 million people in the EU, posing major challenges in diagnosis, treatment, and equitable access to care.

This high-level conference, within the context of the Cyprus Presidency of the Council of the European Union, brings together key stakeholders to strengthen collaboration, foster innovation, and accelerate progress in the development and accessibility of treatments for Rare Diseases.

Conference Objectives

- Enhance collaboration and coordination among EU Member States
- Promote innovation and research development
- Improve the regulatory framework
- Address issues of accessibility and equity
- Increase awareness and knowledge on Rare Diseases
- Enhance data security, infrastructures, access pathways and data security consideration for research and treatment of Rare Diseases

Audience and Stakeholders

- High-level representation from EU officials
- Ministries and public authorities
- Representatives of pharmaceutical and biotechnology companies
- Representatives from regulatory bodies, technology and data specialists
- Patient and advocacy groups
- Non-Governmental Organisations
- Media professionals
- Health Technology Assessment (HTA) experts
- European funding bodies
- Research legal and ethical experts
